## ABOUT US

The Research Group on Environmental Economics is a well established research team with more than 20 years experience in competitive research at national, European and international level. The group offers an economic perspective for the analysis of ecological and socially relevant issues such as climate change adaptation, water scarcity and management, energy transition. Fundamental research in these topics is aligned with applied consultancy work to the European Commission and the Spanish Government as well as to the World Bank and the United Nations. Since 2010 the groups works in a close alliance with the Water Economics Group of the IMDEA Water Foundation.
