## GLOBAL CHANGE ECOLOGY AND EVOLUTION

Code  
810

### GloCEE

#### RESEARCH AREA

Ciencias de la Salud  
Ciencias Experimentales

#### COORDINATOR

Aurelio Malo Valenzuela

#### KEY WORDS

Global change ecology,  
Long-term ecological  
monitoring, Life history  
evolution, Biogeography,  
Paleobiology, Evolutionary  
ecology, Speciation, Biodi-  
versity, Agroecosystems,  
Zoonoses

#### AIM

- Productive sectors such as farms and game reserves
- R + D + I sector
- Education sector

#### CONTACT

aurelio.malo@uah.es

# GLOCEE

## ABOUT US

We are a multidisciplinary group of widely trained ecologist, evolutionary biologists and medical experts that use the best tools that ecology, evolution and health sciences offer to provide optimal and cost-efficient solutions. We address questions integrating the micro and macro temporal scales.

## RESEARCH LINES

- Biological adaptation and plasticity
- Evolutionary ecology
- Biodiversity and biogeographic assessments
- Functional diversity
- Macroevolution
- Zoonotic disease risk
- Animal population management
- Effects of climate change on wild species
- Domestic breeds and zoonosis

## OFFERED SERVICES

- Consultants on the effects of climate effects on agricultural breeds, on natural animal and plant populations and on ecosystems
- Biodiversity and species conservation assessments
- Animal and plant population and genetic management
- Invasive species monitoring
- Analysis of ecosystem services provided

## MARKETABLE RESULTS
